17. Access Summary for Administrators

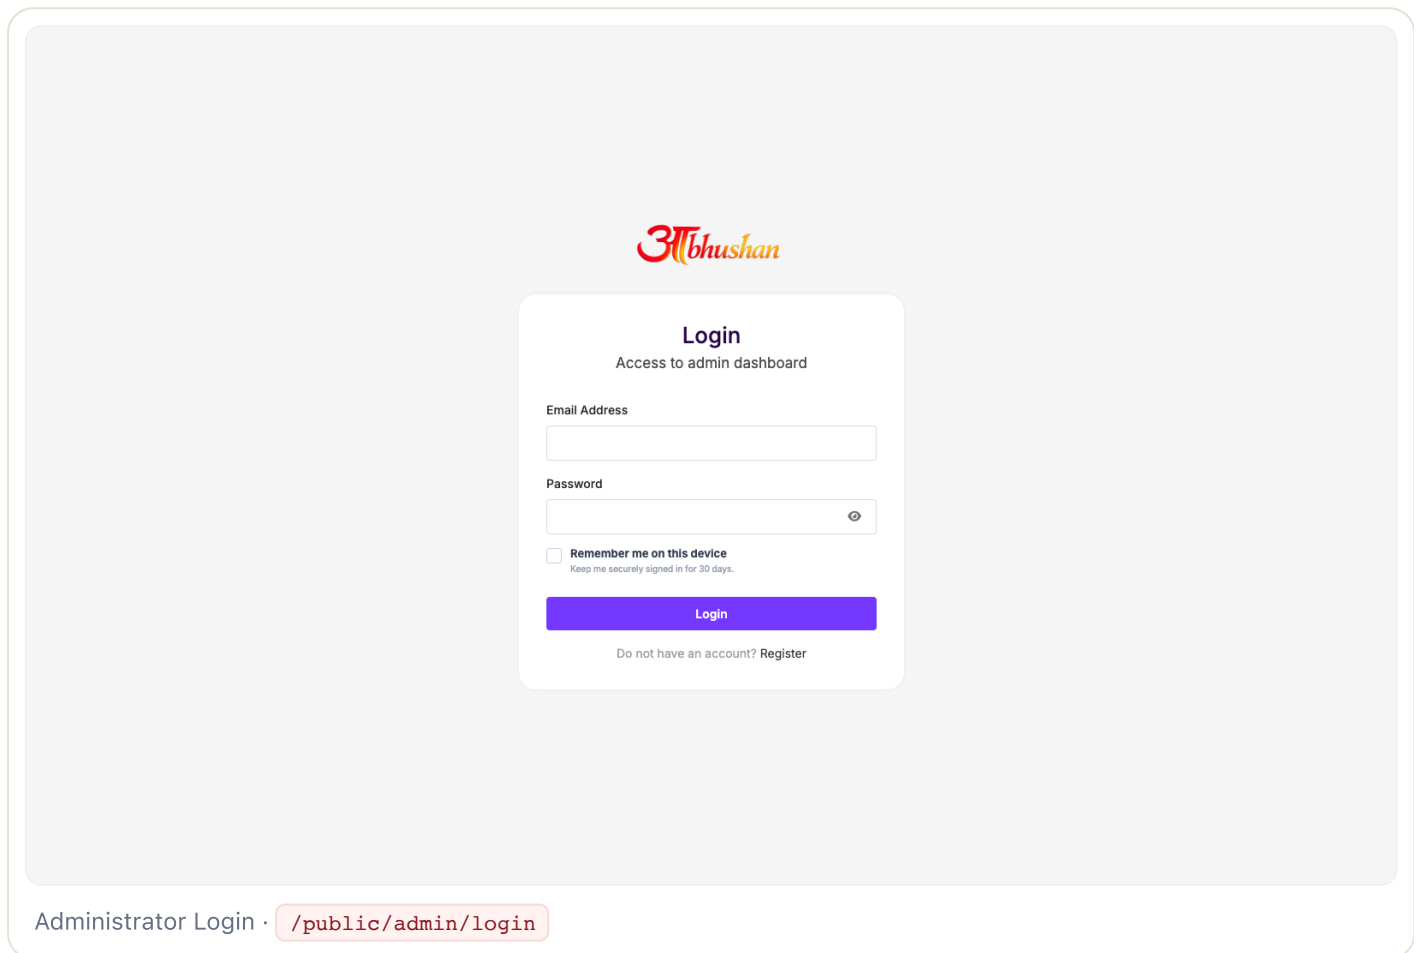

End of guide

Welcome

Aabhushan Jewellery ERP brings customer orders, jewellery production, material inventory, showroom operations, accounts, staff performance and management controls into one workspace. This guide explains what is available on each main page, how to find information quickly, and which actions require additional access.

The screens shown in this guide were captured with a fully authorized administrator account. Your menu may contain fewer options. This is normal: Aabhushan only displays the areas permitted for your role.

Quick start

The image shows a screenshot of the Aabhushan login interface. At the top center is the Aabhushan logo, which consists of a stylized 'A' in red and orange followed by the word 'abhushan' in a lowercase, sans-serif font. Below the logo is a white rectangular box with rounded corners containing the login form. The form has a title 'Login' and a subtitle 'Access to admin dashboard'. It includes two input fields: 'Email Address' and 'Password'. The 'Password' field has a small eye icon to its right. Below these fields is a checkbox labeled 'Remember me on this device' with the text 'Keep me securely signed in for 30 days.' underneath. A prominent blue button labeled 'Login' is positioned below the checkbox. At the bottom of the form, there is a link that says 'Do not have an account? Register'. Below the entire login form, there is a breadcrumb trail: 'Administrator Login · /public/admin/login', where the path is enclosed in a light red rounded rectangle.

1. Open the admin portal and sign in with the email address and password provided by your administrator.
2. Use the left sidebar to choose a module. Select a menu with an arrow to expand its pages.
3. Use the page heading to confirm where you are. The active menu item remains highlighted.
4. Use filters above a register before searching a large date range.
5. Select **View**, the eye icon, or a linked order/reference number to open more detail.
6. Save only after reviewing dates, party names, quantities, weights, rates and uploaded documents.
7. When finished, open the profile menu at the top right and select **Log Out**.

Understanding the interface

Sidebar navigation

The sidebar is grouped by business function: Main, Customers & Orders, Production, Inventory, Showroom, Accounts, Reports and Admin. A whole group may be hidden if your role cannot view any page in that group.

Registers and tables

Most list pages use a register. You can normally:

- use the table search box for a quick text search;
- select a column heading to sort it;
- move between result pages with the pagination controls;
- change the number of rows shown, where that option is available;
- open linked references, attachments or detail pages from the Actions column.

Filters

Date, party, employee, karigar, status and material filters change only the visible results; they do not alter saved data. Select **Reset** to return to the full register. A blank date range generally means all available history.

Export and documents

Some ledgers include **Export Excel**. Exported data reflects the active filters. PDF, print and download buttons open transaction documents such as invoices, vouchers, return receipts, labour bills, packing lists and delivery challans. Allow pop-ups for the portal if a document does not open.

Access and action buttons

Being able to view a page does not always permit changes. Create, edit, delete, payment, status, assignment and configuration actions are granted separately. If an action is missing, disabled or returns an access message, contact the system administrator instead of sharing another user's login.

Safe working practices

- Check the selected customer, vendor, karigar, showroom, warehouse and order before saving.
- Confirm whether a weight is in grams, fine grams, carats, pieces or general quantity.
- Never use stock adjustments to disguise an incorrect purchase, issue or return. Correct the source transaction where possible.
- Add a clear reason or remark to cancellations, adjustments, transfers, deliveries, payments and follow-ups.
- Do not refresh, go back or submit a form twice while a save is in progress.
- Do not delete a master or transaction that has already been used without checking its downstream effect.
- Download or print financial documents only when business policy permits it.

- Keep integration keys, customer details and employee information confidential.

First-login guided tour

On the first successful login, Aabhushan can display an interactive tour. The tour introduces the sidebar, dashboard cards, module navigation, registers and profile menu.

- Select **Next** and **Back** to move through the tour.
- Select **Skip** to close the current tour without permanently opting out.
- Select **Never show again** only if you do not want the first-login tour to open on future logins or devices.
- Tour steps automatically skip menu items that your role cannot access.
- The tour does not save or change business data.

You can replay the guide at any time from the profile menu by selecting **Application Tour**, even after permanently hiding its automatic prompt.

Admin Dashboard · </public/admin/dashboard>

The dashboard is the daily starting point for operational work.

What you can see

- orders that still need a karigar assignment;
- active customers, active orders and orders dispatched today;

- fine-gold stock, pending gold requirement and average pure-gold price;
- an assignment queue with order, customer/source, type, due date and priority;
- recent orders with current status.

Key actions

- Open any linked order or customer register.
- Select **View Queue** for unassigned production orders.
- Use **New Order** or **Add Customer** when your role permits it.

Access note: Viewing requires Dashboard access. New orders and new customers require their own create permissions.

2. Customers & Orders

2.1 Customers

Open: Customers & Orders → Customers

Address: `/public/admin/customers`

The screenshot shows the Aabhusan Customer Directory interface. On the left is a sidebar menu with categories: Main (Dashboard), Customers & Orders (Customers, Orders), Production (Karigars, Material Issue, Designs), Inventory (Gold Inventory, Diamond Inventory, Stone Inventory, Inventory Setup), Showroom (Retail Showroom), Accounts (Accounts), Reports (Reports), and Admin (Vendors, Staff & Organization, Performance). The main content area is titled 'CUSTOMER DIRECTORY' and 'Customers', with a subtitle 'Manage billing profiles and customer contact details.' and an 'Add Customer' button. Below this is a table with columns: CODE, NAME, PHONE, EMAIL, GSTIN, PORTAL ACCESS, and SALES TEAM. The table contains one entry for 'Mahalaxmi Gold and Jewellers Hyderabad' with code 'CU26082711383969', email 'order@aabhusan.in', and '0 salespersons'. The 'PORTAL ACCESS' status is 'Enabled'. Navigation buttons 'Previous', '1', and 'Next' are at the bottom of the table. The top right shows the user 'Admin Admin User'. The bottom breadcrumb shows 'Customers · /public/admin/customers'.

CODE	NAME	PHONE	EMAIL	GSTIN	PORTAL ACCESS	SALES TEAM
CU26082711383969	Mahalaxmi Gold and Jewellers Hyderabad	-	order@aabhusan.in	-	Enabled	0 salespersons

The customer directory shows customer code, name, phone, email, GSTIN, portal-access status and sales-team information.

Key actions

- Select **Details** to review a customer profile, addresses, portal users and recent orders.
- Select **Add Customer** to create a customer.
- From Customer Details, authorized users can add a portal user or replace a portal user's password.

Access note: Customer viewing and customer creation are separate rights. Passwords are never displayed; they can only be replaced.

2.2 Order Dashboard

Order Dashboard · `/public/admin/orders/dashboard`

The Order Dashboard gives a visual view of the production pipeline. It highlights total orders, delayed orders, repeat orders, repeat designs and the count at each workflow stage.

What you can see

- order image and number;

- customer or source;
- design and repeat-design indicator;
- current workflow status and delay information;
- due date and assigned karigar.

Key actions

- Select a summary or workflow card to filter the register.
- Select **Timeline** to review all follow-ups, order images and status history without leaving the page.
- Select **View** to open the complete order.
- Use **Clear Filter** to return to all orders.

Ready Orders · </public/admin/orders/ready>

Ready Orders focuses on completed production items that are ready for the next dispatch, showroom or delivery step. It uses the same register layout as All Orders.

Key actions

- Open the order and ornament details.
- Review the customer, karigar and completion status.
- Generate the packing list or delivery challan when permitted.

2.5 Repair Orders

Open: Customers & Orders → Orders → Repair Orders

Address: </public/admin/orders/repair>

The screenshot displays the 'Repair Orders' interface within the 3Tbhushan system. The left sidebar contains a navigation menu with categories: Main (Dashboard), Customers & Orders (Customers, Orders, Order Dashboard, All Orders, Ready Orders, Repair Orders, Followups), Production (Karigars, Material Issue, Designs), Inventory (Gold Inventory, Diamond Inventory, Stone Inventory, Inventory Setup), Showroom (Retail Showroom), Accounts (Accounts), and Reports. The main content area features a 'PRODUCTION WORKFLOW' header for 'Repair Orders' with a sub-note 'Track customer orders, assignments, production and delivery status.' and a 'Repair Receive' button. Below this is a table with columns: ORDER NO, ORDER FROM, CUSTOMER, SALES PERSON, KARIGAR, TYPE, STATUS, PRIORITY, DUE DATE, and ACTIONS. The table is currently empty, showing 'No orders found.' The breadcrumb at the bottom indicates the current path: 'Repair Orders · /public/admin/orders/repair'.

Repair Orders contains orders whose type is Repair. It keeps repair work separate from fresh production while retaining the normal order workflow.

Key actions

- Select **Repair Receive** to record a new repair intake.
- Open, edit, assign, receive or cancel repair work according to your role.

Access note: The Repair Orders menu is shown only to users who can both view orders and create orders.

2.6 Order Followups

Open: Customers & Orders → Orders → Followups

Address: </public/admin/orders/followups>

The screenshot shows the 3Tbhushan web application interface. The sidebar on the left contains a navigation menu with categories: Main (Dashboard), Customers & Orders (Customers, Orders), Production (Karigars, Material Issue, Designs), Inventory (Gold Inventory, Diamond Inventory, Stone Inventory, Inventory Setup), Showroom (Retail Showroom), Accounts (Accounts), Reports (Reports), and Admin (Vendors, Staff & Organization). The main content area is titled 'Order Followups' and features a table with the following columns: ORDER NO, CUSTOMER, KARIGAR, STATUS, DUE DATE, NEXT FOLLOWUP, FOLLOWUP STATE, DAYS LEFT, LAST TAKEN ON, and ACTION. The table is currently empty, displaying the message 'No orders found.' The user is logged in as 'Admin Admin User'.

Order Followups · </public/admin/orders/followups>

The follow-up register helps production teams identify the next required contact or progress check. It shows customer, karigar, order status, due date, next follow-up, follow-up state, days left and the last follow-up time.

Key actions

- Open the linked order number for full context.
- Select **Take Followup** to record a stage, description, next follow-up date/time and optional image.
- Use the pending and delayed labels to prioritize work.

Access note: Saving a follow-up requires Follow-up access in addition to Order viewing.

3. Production

3.1 Karigars

Open: Production → Karigars

Issuements · </public/admin/issuements>

Material Issue provides one combined register and separate Gold, Diamond and Stone issue registers. Each entry identifies its date, voucher, material, karigar, warehouse, purpose, quantity or weight, pieces and value.

Key actions

- Select **Create Issuement** to issue one or more materials.
- Open an issue to review its lines and attachments.
- Open or print the voucher where permitted.

Access note: Creating and printing issuements are separate from viewing them.

Design Master · </public/admin/designs>

The Design Master is the reusable design catalogue. It displays image preview, design code and name, classification, preferred karigar, expected gold weights, studded information and source.

Key actions

- Browse designs before creating an order.

- Select **Add Design** to upload a design and record its production details.
-

4. Gold Inventory

Gold Inventory tracks purity-based material from purchase through issue, return, correction and current balance. Gold weights are shown in grams; fine-gold figures represent the pure-gold equivalent.

4.1 Gold Purity Master

Open: Inventory → Gold Inventory → Purity Master

Address: </public/admin/gold-inventory/purities>

Gold Stock Adjustments · /public/admin/gold-inventory/adjustments

Adjustments record controlled corrections to stock. The register shows date, adjustment type, location, line count, total weight and value.

Key actions: Filter by date and open the adjustment; authorized users can create, edit or delete an adjustment.

Safety: Use an adjustment only for a genuine, approved correction. Record a meaningful reason and verify whether the change increases or decreases stock.

Gold Ledger · </public/admin/gold-inventory/ledger>

The Gold Ledger gives a dated running history of debit and credit weight, fine-gold movement, balances, rate, value, reference and notes.

Key actions: Filter by date, transaction type, item and karigar. Use references to reconcile the ledger with source purchases, issues, returns and adjustments.

5. Diamond Inventory

Diamond Inventory tracks items by attributes such as type, shape, chalni, color, clarity and cut. Quantities are recorded in pieces and carats.

Showroom Stock · </public/admin/showroom-stock>

This page combines current stock, reservations and movement history.

What you can see

- tag and source order;
- showroom and counter location;
- gross weight, net gold and diamond weight;
- availability or reservation status;
- customer/order and expiry information for reservations;
- previous movement from one location or state to another.

Key actions

- Transfer finished goods to a showroom.
- Allocate showroom stock to a counter or return it from a counter.
- Reserve an item for a customer/order and release a reservation.
- Start billing an available or reserved item.

Access note: Stock movement, reservations and sales are separate responsibilities. Your role may permit one action but not the others.

8.3 Jewellery Inventory

Inventory Record & Transfer / Delivery History

DATE	TAG	ORDER	DESIGN	ACTION	REMARK
No transfer or delivery history					

Jewellery Inventory · /public/admin/jewellery-inventory

Jewellery Inventory is the visual finished-goods register. Summary cards show active and closed items, active gross weight, active net gold and active diamond carats.

The active register includes image, tag/order, karigar/group, design, metal and studded weights, value/labour and current status. A separate history records transfer and delivery actions.

Key actions: Filter by karigar; open an item image; mark an active item **Transferred** or **Delivered** with a required remark when authorized.

Safety: Closing an active inventory item removes it from the active list but preserves it in history. Confirm the physical movement before saving.

8.4 Showroom Master

Open: Showroom → Retail Showroom → Showrooms

Address: </public/admin/showrooms>

The screenshot displays the '3Tbhushan' application interface. On the left is a sidebar menu with categories: Main (Dashboard), Customers & Orders (Customers, Orders), Production (Karigars, Material Issue, Designs), Inventory (Gold Inventory, Diamond Inventory, Stone Inventory, Inventory Setup), Showroom (Retail Showroom, Showroom Sales, Showroom Stock, Jewellery Inventory, **Showrooms**, Counters, Staff Assignment), and Accounts (Accounts). The main area is titled 'SHOWROOM MASTER'. It features a '+ Add Showroom' button, a 'Show 10 Entries' dropdown, and a table with headers: CODE, NAME, TYPE, MANAGER, CITY, STATE, PHONE, STATUS, and ACTIONS. The table body shows 'No records available' with 'Previous' and 'Next' pagination buttons. The bottom of the interface shows the breadcrumb 'Showroom Master' and the URL </public/admin/showrooms>.

The Showroom Master lists code, name, type, manager, city, state, phone and active status.

Key actions: Add or edit a showroom and activate/deactivate it. Do not deactivate a location while stock is still assigned without first reviewing the stock position.

8.5 Counter Master

Open: Showroom → Retail Showroom → Counters

Address: </public/admin/showroom-counters>

Showroom Staff Assignment · /public/admin/showroom-staff

This page records which employee works in each showroom, their designation and showroom role, whether the assignment is primary, its effective dates and status.

Key actions: Assign an employee, edit an assignment and activate/deactivate it. Avoid overlapping primary assignments unless that is intentional.

9. Accounts

Accounts pages bring together purchases, labour, sales, payments, journals, GST and party balances. Financial figures should be reviewed against approved source documents.

Journal Vouchers · `/public/admin/accounts/journal-vouchers`

Journal Vouchers records party-to-party adjustments and expenditure entries. The upper form captures voucher type, date, amount, status, parties or expense head, payment mode, reference and notes. Voucher History appears below it.

Key actions: Save a Posted or Draft party adjustment/expense; review past vouchers.

Safety: A posted voucher affects accounts reporting. Confirm both sides, amount and date before saving. Use a specific expense head rather than a vague label.

General Ledger · </public/admin/accounts/general-ledger>

The General Ledger is a filterable register of accounting activity. It includes date, transaction type, reference, party, bill/invoice, order, material, debit, credit, open balance, status, mode, details, files and notes.

Key actions: Filter by date, transaction type, party type/party, status, reference or global search; select **Export Excel** to export the filtered register.

9.5 Issue Receive Ledger

Open: Accounts → Accounts → Issue Receive Ledger

Address: </public/admin/accounts/vendor-transaction-ledger>

Issue Receive Ledger · </public/admin/accounts/vendor-transaction-ledger>

This ledger reconciles material issued and received with financial position. Summary cards show row count, gold issued/received, carats issued and payable/paid totals. The register includes material quantities, party, order, reference, balance, mode, document and notes.

Key actions: Filter by date, party, category, transaction, material or reference; export the filtered result; open source details/files.

Previous 1 2 3 Next

The New Payment form pays a vendor or karigar. It shows the selected party's balance and accepts date, amount, mode, reference number, supporting file, optional bill and notes. Payment History appears below.

Key actions: Record a payment and attach proof; review previous payments.

Safety: Confirm the party and displayed balance, avoid paying more than the approved amount, and add the UTR/cheque/reference wherever available.

GST Report · </public/admin/accounts/gst-report>

The GST Report shows sales taxable value, sales GST, purchase GST and estimated net GST payable. It also includes the GST working formula and separate sales, purchase and debit/credit-note registers.

Key actions: Apply a date range, reset filters and use the underlying registers to verify the summary. Treat the report as an operational aid and reconcile it before statutory filing.

10. Reports

Reports are designed for review and analysis. Filters affect only the displayed results. Keep a record of the date range and filters used when sharing an export.

Combined Transaction Report - </public/admin/reports/transactions>

All Transactions is the unified business-activity register. It combines purchases, issuements, receiving, returns and payments across materials and parties.

What you can see

- transaction counts by activity;
- total transaction value and gold, diamond and stone movement;
- date, activity, material, reference, order, party, status, movement detail, amount and notes.

Key actions: Filter by date, activity, transaction type, material, party type, karigar, customer, vendor, status, order number or global search.

Inventory Report · /public/admin/reports/inventory

This report summarizes gold weight/fine/value and diamond pieces/carats/value. It also shows purchase, issue and return movement for the selected period, followed by Gold Stock and Diamond Stock valuation tables.

Key actions: Select a From/To date to review period movement; reset to return to the default view.

KARIGAR	PERIOD	ORDERS	AVG DAYS	DELIVERED GM	DELIVERED FINE GM
No records found.					

Karigar Performance Report · </public/admin/reports/karigar-performance>

The report compares delivered orders, delivered gold/fine gold and average turnaround time. Results are grouped by karigar and period.

Key actions: Choose month-wise or custom-range mode and optionally select one karigar.

Interpretation note: Turnaround time should be reviewed alongside order complexity, priority and rework rather than used alone.

Vendors · `/public/admin/vendors`

The Vendor List shows name, contact person, phone, email and GSTIN. Users with management access also see an Add Vendor form.

Key actions: Create a vendor and open **Account & Ledger** for financial history. Search carefully before adding a vendor to avoid duplicates.

11.2 Department Master

Open: Admin → Staff & Organization → Departments

Address: </public/admin/departments>

The screenshot shows the 'Department Master' page in the 3Tbhushan system. The page has a sidebar on the left with a navigation menu. The main content area displays a table for managing departments. The table has columns for CODE, DEPARTMENT, SORT ORDER, STATUS, NOTES, and ACTIONS. Currently, no departments are found. A red button labeled '+ Add Department' is located in the top right corner of the table area. The page title is 'Department Master' and the subtitle is 'Manage core departments for staff, hierarchy, and future access control.' The breadcrumb trail at the bottom shows 'Department Master' and the URL </public/admin/departments>.

Department Master
Manage core departments for staff, hierarchy, and future access control.

[+ Add Department](#)

CODE	DEPARTMENT	SORT ORDER	STATUS	NOTES	ACTIONS
No departments found.					

Department Master · </public/admin/departments>

Departments define the main organizational units. The register shows code, name, sort order, status and notes.

Key actions: Add or edit a department and toggle its status.

No designations found.							

Designation Master

/public/admin/designations

Designations define job level and reporting structure within a department. The register shows code, department, level, reports-to designation, manager capability and status.

Key actions: Add or edit a designation and change its status. Set reporting levels consistently so hierarchy and performance reports remain meaningful.

Employee Master

Manage internal staff records, admin login linkage, and hierarchy entry points.

+ Add Employee

CODE	EMPLOYEE	DEPARTMENT	DESIGNATION	LOCATION	ADMIN LOGIN	STATUS	ACTIONS
No employees found.							

Employee Master · /public/admin/employees

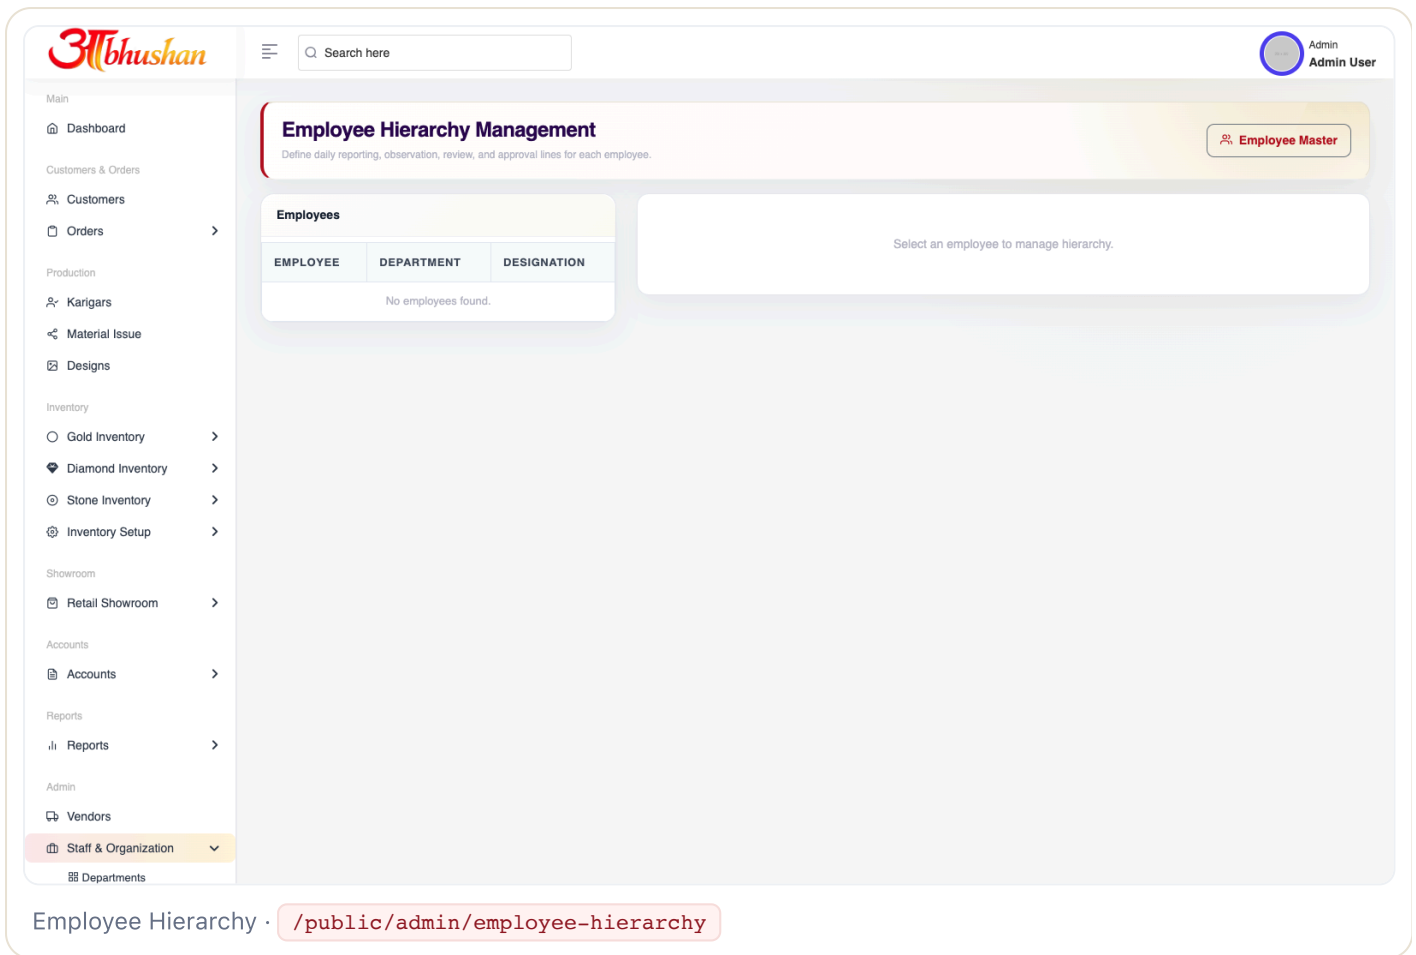

The Employee Master lists code, employee/contact details, department, designation, work location, linked admin login and status.

Key actions: Add/edit an employee, activate/deactivate the record and open Employee Hierarchy. Linking an employee to an admin login does not by itself grant roles or permissions.

11.5 Employee Hierarchy

Open: Admin → Staff & Organization → Employee Hierarchy

Address: /public/admin/employee-hierarchy

Select an employee to view their profile, current structure, direct team and hierarchy history. The hierarchy can record Reporting, Observing, Reviewing and Approving managers plus Department Head.

Key actions: Assign manager relationships with an effective date and remark; review previous assignments.

Safety: Do not assign an employee as their own manager or create circular reporting chains.

12. Performance

12.1 KPI Dashboard

Open: Admin → Performance → KPI Dashboard

Address: </public/admin/performance/dashboard>

The KPI Dashboard shows target count, employee count, total target value and estimated incentive for a selected month. The register compares target, achievement percentage and incentive by employee/KPI.

Key actions: Filter by year, month and employee; create a new target when permitted.

12.2 KPI Master

For JSON request bodies use *_json placeholders like {{message_json}} and {{to_json}}.

Company Settings · </public/admin/company-settings>

Company Settings controls information used across documents and notifications.

What you can see

- company name, phone, email, GSTIN, address, city/state/pincode and logo;
- issuance, delivery-challan and sale-bill prefixes;
- OneSignal push enablement, App ID, API key and Sender ID;
- WhatsApp endpoint, method, authentication, sender, internal recipients and extra headers;
- event controls and templates for order creation, status, ready, over-budget and daily delay messages.

Key actions: Update company details, logo, document prefixes or notification integrations and select **Save Settings**.

Safety: Integration tokens are confidential. Test changes in a controlled way, keep a secure copy of the previous working configuration, and never place live API keys in screenshots or public documents.

13.2 Database Update

Open: Admin → Database Update

Address: </public/admin/system/database-update>

The screenshot displays the 'Database Update' interface for 31bhushan. The left sidebar contains a navigation menu with categories like Main, Customers & Orders, Production, Inventory, Showroom, Accounts, Reports, and Admin. The main content area is titled 'SYSTEM MAINTENANCE Database Update' and includes a 'Database Up to Date' button. It features three summary cards for migration counts and a 'Pending Database Changes' section showing 'No pending migrations'. A 'Recently Applied' list on the right details various system updates with their respective batch numbers and dates.

Database Update · </public/admin/system/database-update>

The page reports available, applied and pending database migrations and lists recently applied changes.

Key action: Select **Run Database Update** only when pending migrations exist and an approved deployment requires them.

Critical safety

- Take and verify a current database backup first.
- Ensure no long-running import or transaction is in progress.
- Do not close or refresh the page while an update is running.
- If an update reports an error, preserve the message and contact technical support; do not repeatedly run it.

This page is intentionally restricted to high-level administrators.

14. Users & Access

Access Control determines who can see information and who can change it. Follow the principle of least privilege: give each person only the access required for their work.

14.1 Roles

User Access Control · /public/admin/access/users

User Access lists each admin user, employee link, designation, role count, individual overrides and status.

Key actions

- Create a user with name, email, password and at least one active role.
- Select **Details** to review identity and access.
- Link an employee, assign roles and apply carefully chosen user-specific overrides.
- Activate/deactivate the account or replace its password.

Security guidance

- Never reveal, copy or request an existing password; replace it securely when needed.
- Use a unique password of at least eight characters and confirm it before saving.
- Deactivate users promptly when access is no longer required.
- Prefer role-based access over many individual overrides.
- Review privileged accounts regularly.

15. Common Tasks

Create and begin a new order

1. Confirm the customer exists in **Customers**; add the customer if needed.
2. Open **All Orders** and select **Create Order**.
3. Choose the customer/source, design, order type, priority and due date.
4. Record material and production requirements carefully and upload the available reference images.
5. Save the order, then assign a karigar from the order register or details page.
6. Use **Followups** and the Order Timeline to monitor progress.

Receive finished work and prepare dispatch

1. Open the order and verify the assigned karigar and issued material.
2. Use the authorized Receive action to record finished weights, studded material, labour and supporting details.
3. Check the item in **Jewellery Inventory** or **Ready Orders**.
4. Generate packing/delivery documents, or transfer the item to Showroom Stock as required.

Record material movement

1. Create the purchase if new material has arrived.
2. Issue material through **Material Issue**, choosing the correct warehouse, karigar, order and purpose.
3. Record returned unused material through the matching Gold, Diamond or Stone Return page.
4. Reconcile balances in Stock, Ledgers and Reports.

Record a supplier or karigar payment

1. Review Pending Parties, Purchase Bills or Labour Bills.
2. Confirm the approved pending amount and supporting document.
3. Open **Payments**, select the correct party and optional bill, then enter amount, mode and reference.
4. Attach proof and save.
5. Recheck the party or labour ledger.

Investigate a delayed order

1. Open **Order Dashboard** and select the Delayed card.
2. Open **Timeline** to review status history, images and earlier follow-ups.

3. Record a meaningful follow-up with next date/time.
 4. Open Order Details if assignment, status, due date or supporting documents need attention.
-

16. Troubleshooting

A menu or button is missing

Your role probably does not include that page or action. Ask an administrator to review your role; do not use another person's account.

A register is empty

- Select **Reset** to clear filters.
- Check the From and To dates.
- Confirm that the required master or transaction has been created.
- Verify that you are viewing the correct status-specific page, such as Ready or Repair Orders.

A PDF or attachment does not open

- Allow pop-ups for the portal.
- Try opening the link in a new tab.
- Confirm that the original file was uploaded and that your role can access the document.

A save fails

- Read the validation message and correct the highlighted field.
- Confirm required parties, dates, quantities and remarks are present.
- Check that uploaded files use an accepted type and reasonable size.
- Do not repeatedly submit the same form.

Data looks incorrect

Note the page, filter, order/voucher/reference number and expected value. Take a screenshot that does not expose passwords or API keys, then report it to the administrator. Avoid creating an adjustment until the source transaction has been checked.

17. Access Summary for Administrators

The following plain-language access groups correspond to the main sidebar areas:

Area	View access	Additional action access
Dashboard	Dashboard view	Order/customer create rights for quick actions
Customers	Customer view	Customer creation and portal-user management
Orders	Order view	Create, edit, assign, receive, follow-up, status and document rights
Production masters	Karigar/design view	Master management and karigar-payment rights
Material Issue	Issuement view	Create and print rights
Gold/Diamond/Stone Inventory	Material inventory view	Material inventory management
Inventory Setup	Setup view	Warehouse/bin management
Showroom	Masters, stock or sales view	Master, stock-movement, reservation and sales management
Accounts	Accounts view	Payment/posting rights
Reports	Reports view	Reports are primarily read-only
Organization	Department/designation/employee/hierarchy view	Matching management right for each area
Performance	Dashboard/KPI/target/incentive view	Matching management right for each area
Company Settings	Settings view	Settings management
Database Update	Restricted system-management access	Same restricted access runs migrations
Users & Access	Role/permission/user view	Matching access-management right

End of guide

For application access, master-data corrections or workflow questions, contact your Aabhushan system administrator. For technical errors, include the page name, date/time and relevant order, voucher, invoice or reference number.

Screens can vary by role permissions and later application updates. Integration credentials were intentionally hidden in the screenshots. Contact your administrator when an expected menu or action is unavailable.
